*A non-periodontal based cleaning is considered a prophylaxis and is preventative in nature. It is defined as the removal of plaque, calculus, and stain from tooth structures above the gum line. This cleaning is reserved for patients without any significant bone loss, loss of connective-tissue attachment, or presence of infection.

*A periodontal maintenance cleaning is performed on a patient that has previously undergone scaling and root planing procedures. This cleaning is ongoing and therapeutic in-nature, not preventative. It is defined as the removal of plaque, calculus and stain from tooth structures and bacteria within the pockets.

Program Guidelines: Annual fee and patients portion of any bill is due the day of service and any services not paid for at the time of service will be billed at usual and customary fees. This plan can't be used in conjunction with another dental plan, dental or medical insurance, or financing such as CareCredit. This plan is non-refundable and no refunds will be issued at any time even if participant decides to not utilize the full dental plan. This plan is a discount plan honored only at Dentistry on Carmel and not a dental insurance plan.
